INSTALLATION

1. Using rubbing alcohol and a clean rag, clean the surface of your helmet. This will remove any surface dirt and oils to ensure the helmet mirror will secure properly to your helmet.
2. Before removing the adhesive backing, test the placement of your mirror on the helmet to ensure that it gives you a clear picture of what is behind you while not obstructing your forward vision.
3. Once proper mirror placement has been determined, remove the adhesive backing and place helmet mirror on the outer shell of your helmet.
4. Adjust mirror for clear rearward vision.

ONGOING MAINTENANCE

Periodically check for any excessive wear and make sure the mirror is adequately secured to your helmet, and keeps your desired adjustments in place.
